Opro9 SmartDiaper

Comfort is the most important key to a baby's healthy growth

Features

- Instant notifications when child pees the diaper, which aids in reducing diaper rash
- Download easy-to-understand and easy-to-use app, free from the App store and Google play.
- Wearable device easy to attach to children's diapers, works for children of both genders
- Wearable device made of non-toxic materials
- Anti-Loss reminder, parents receive notifications when wearable device disconnects from app

Simple to use, get started in just three steps!

1.

**Connect to the wearable via
Bluetooth Opro9 SmartDiaper
App**

2.

**Attach the Opro9 SmartDiaper
wearable to the appropriate
location on the diaper**

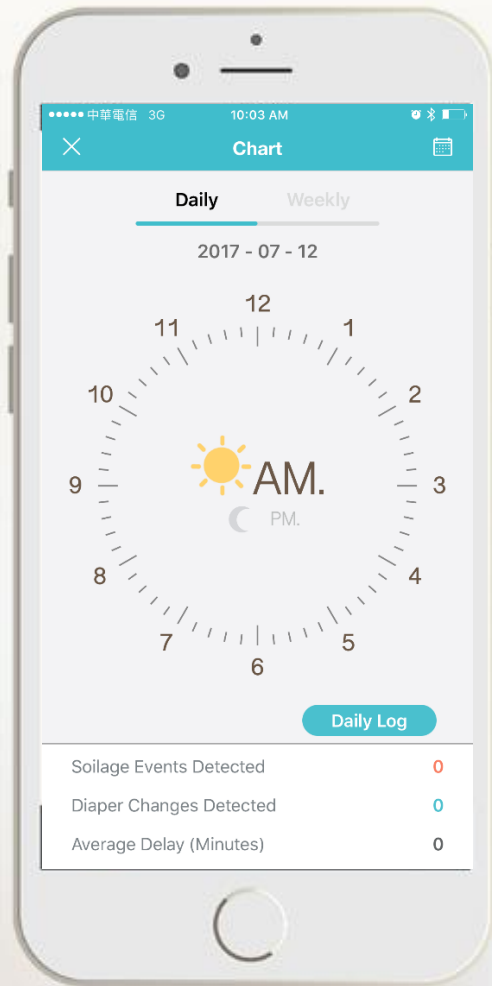

3.

**Use the App and begin
monitoring!**

Receive instant alerts

When a parent's smart device is connected to the Opro9 SmartDiaper wearable via the Opro9 SmartDiaper App, he or she can receive instant notifications about when a baby pees. This way you can attend to your child quickly, preventing bothersome rashes and other skin issues.

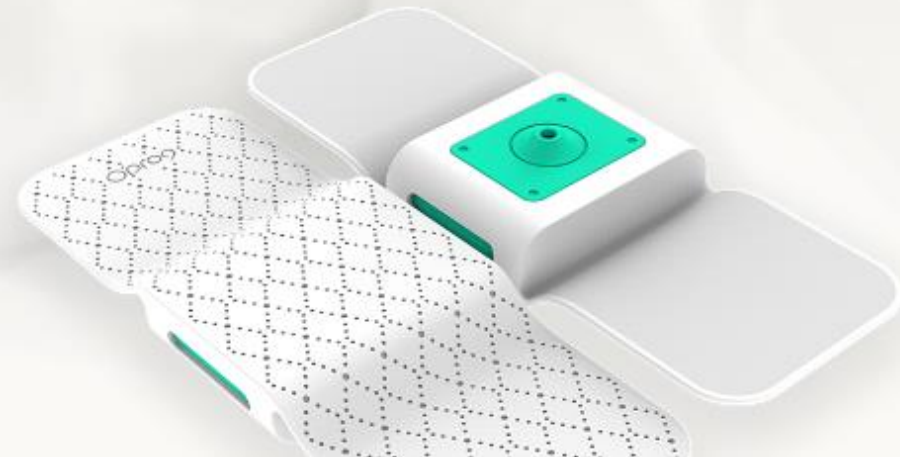

Understand your child's habits

Opro9 SmartDiaper automatically records the time and frequency of when the wearer pees, and when the wearer's diaper is replaced. The Opro9 SmartDiaper App also stores this data on our cloud storage service, so even if you switch phones, you can still access your baby's data!

Monitoring multiple wearables is a breeze

One smart device can connect to multiple Opro9 SmartDiaper wearables at the same time

The Opro9 SmartDiaper app connects to Opro9 SmartDiaper wearables via Bluetooth Low Energy 4.0, and can simultaneously support connections to 5 Opro9 SmartDiaper wearables, so even if you have triplets, you can monitor them all simultaneously!

Breathable (Design Concept)

Flexible (ergonomics)

Cleans easily with water (user experience)

Durable and long lasting (user experience)

Using breathable material textures, will change consumers expectations about high-tech childcare products

Concepts

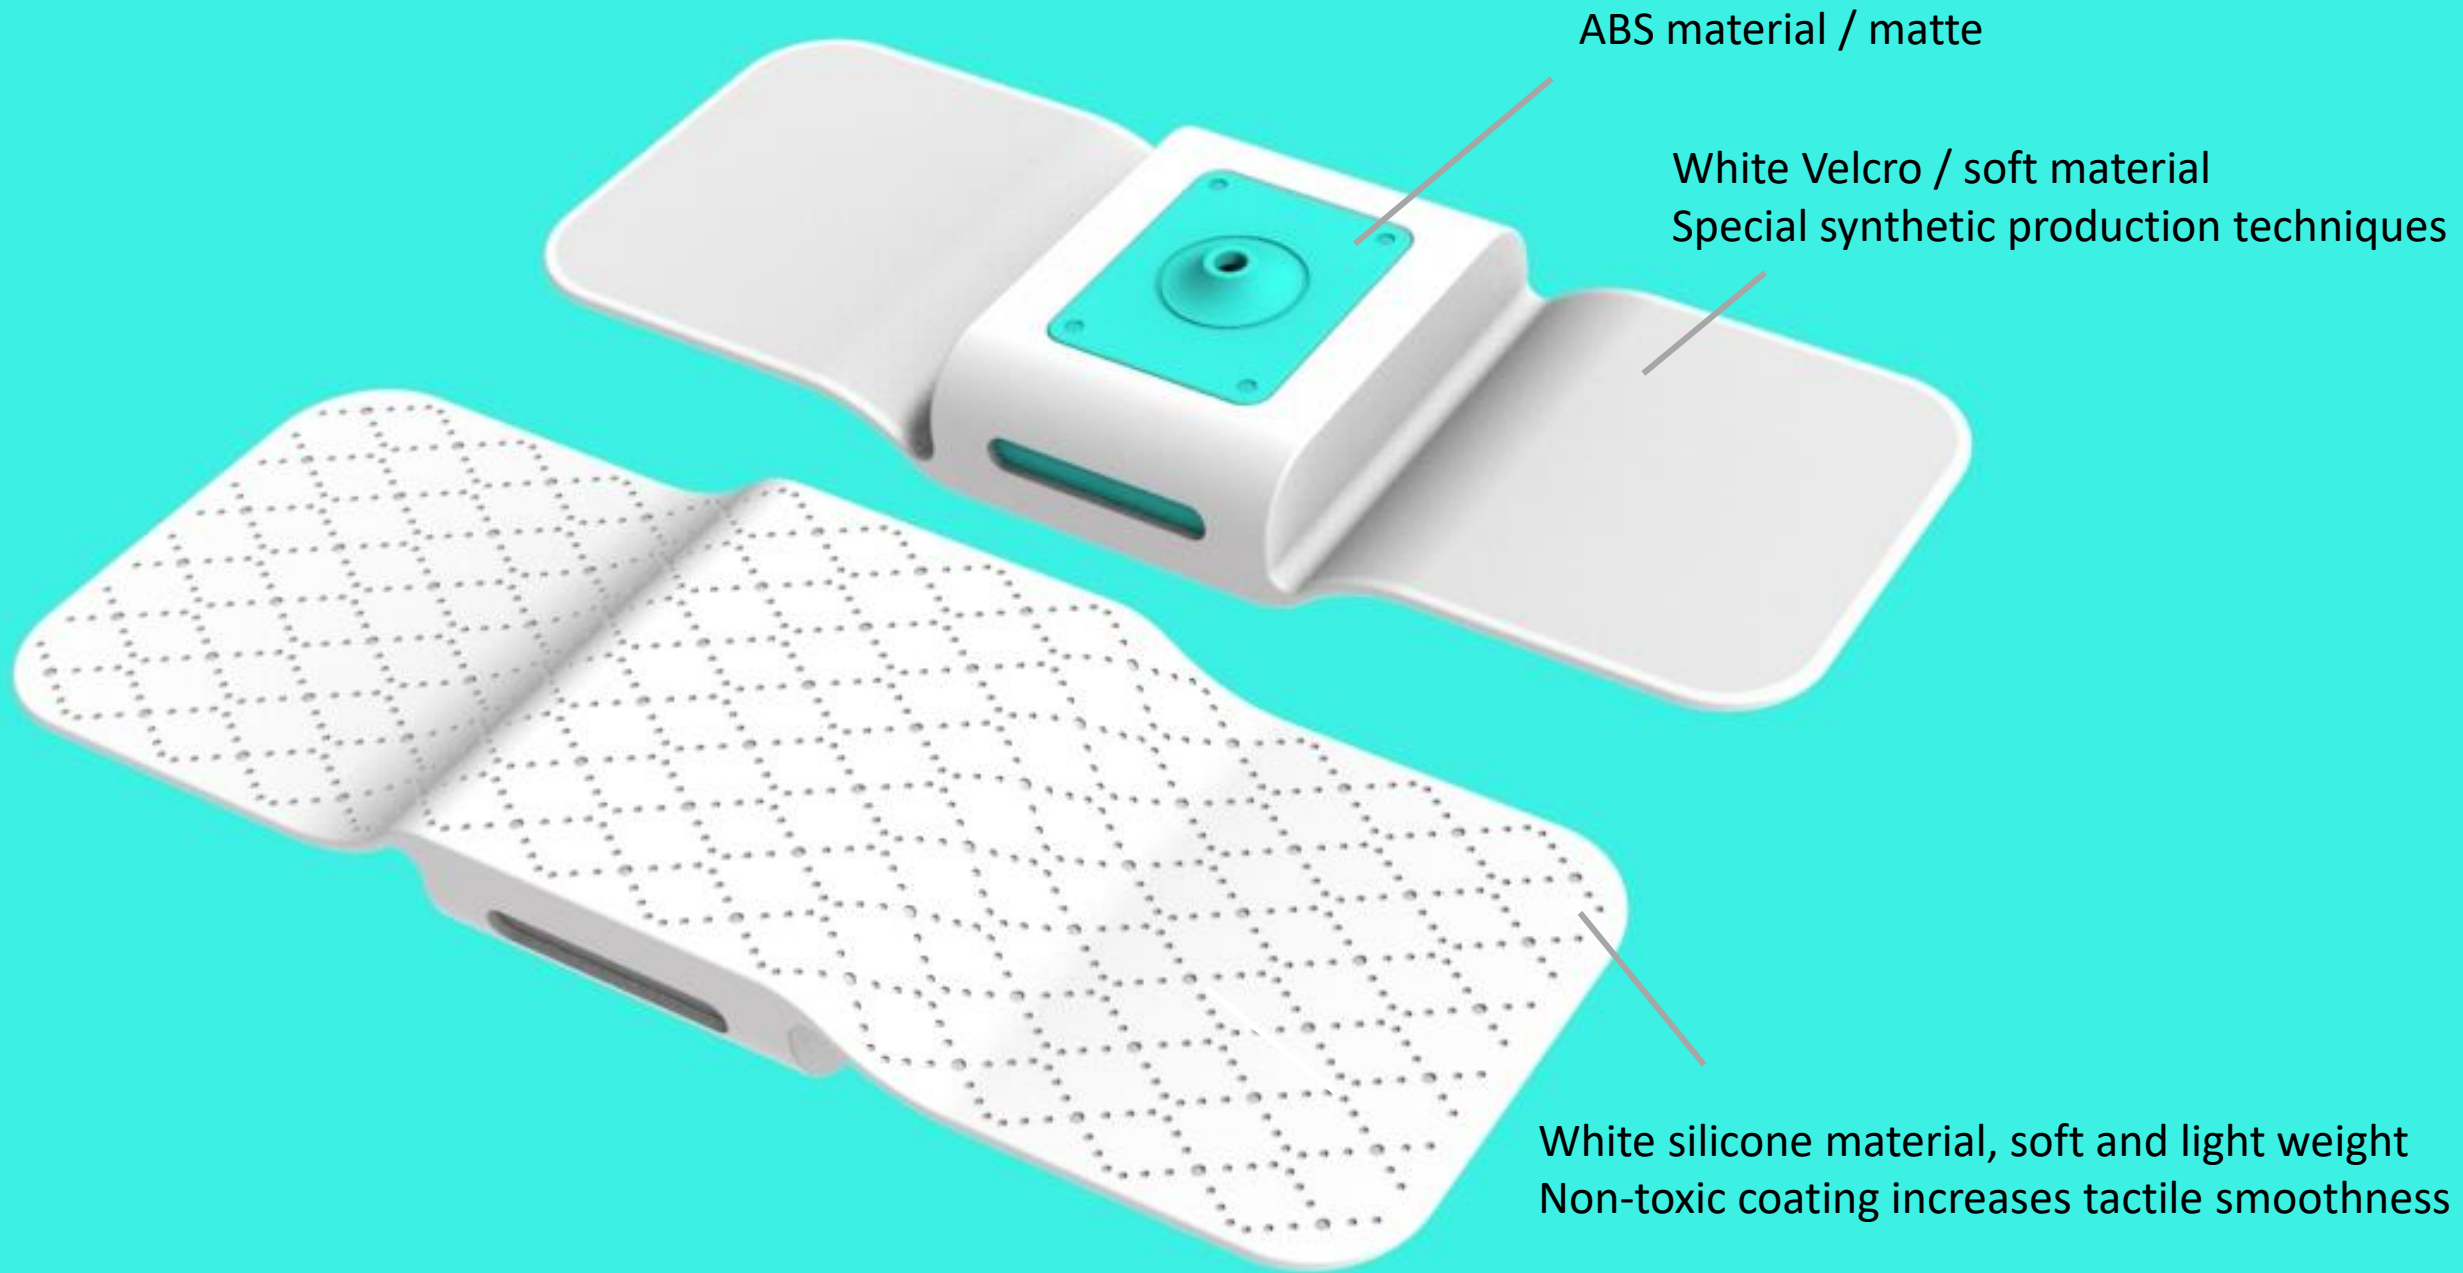

Covering is textured with patterns similar to band-aids, makes users feel like product is more familiar and less "techy"
Attaches in a velcro-like fashion to infant diapers

4cm x 11cm x 1.25cm

Thin / breathable / attaches snugly / washable / durable

Two-color design and highly detailed patterning feels well-designed
Whether visual or tactile, texturing feels better!

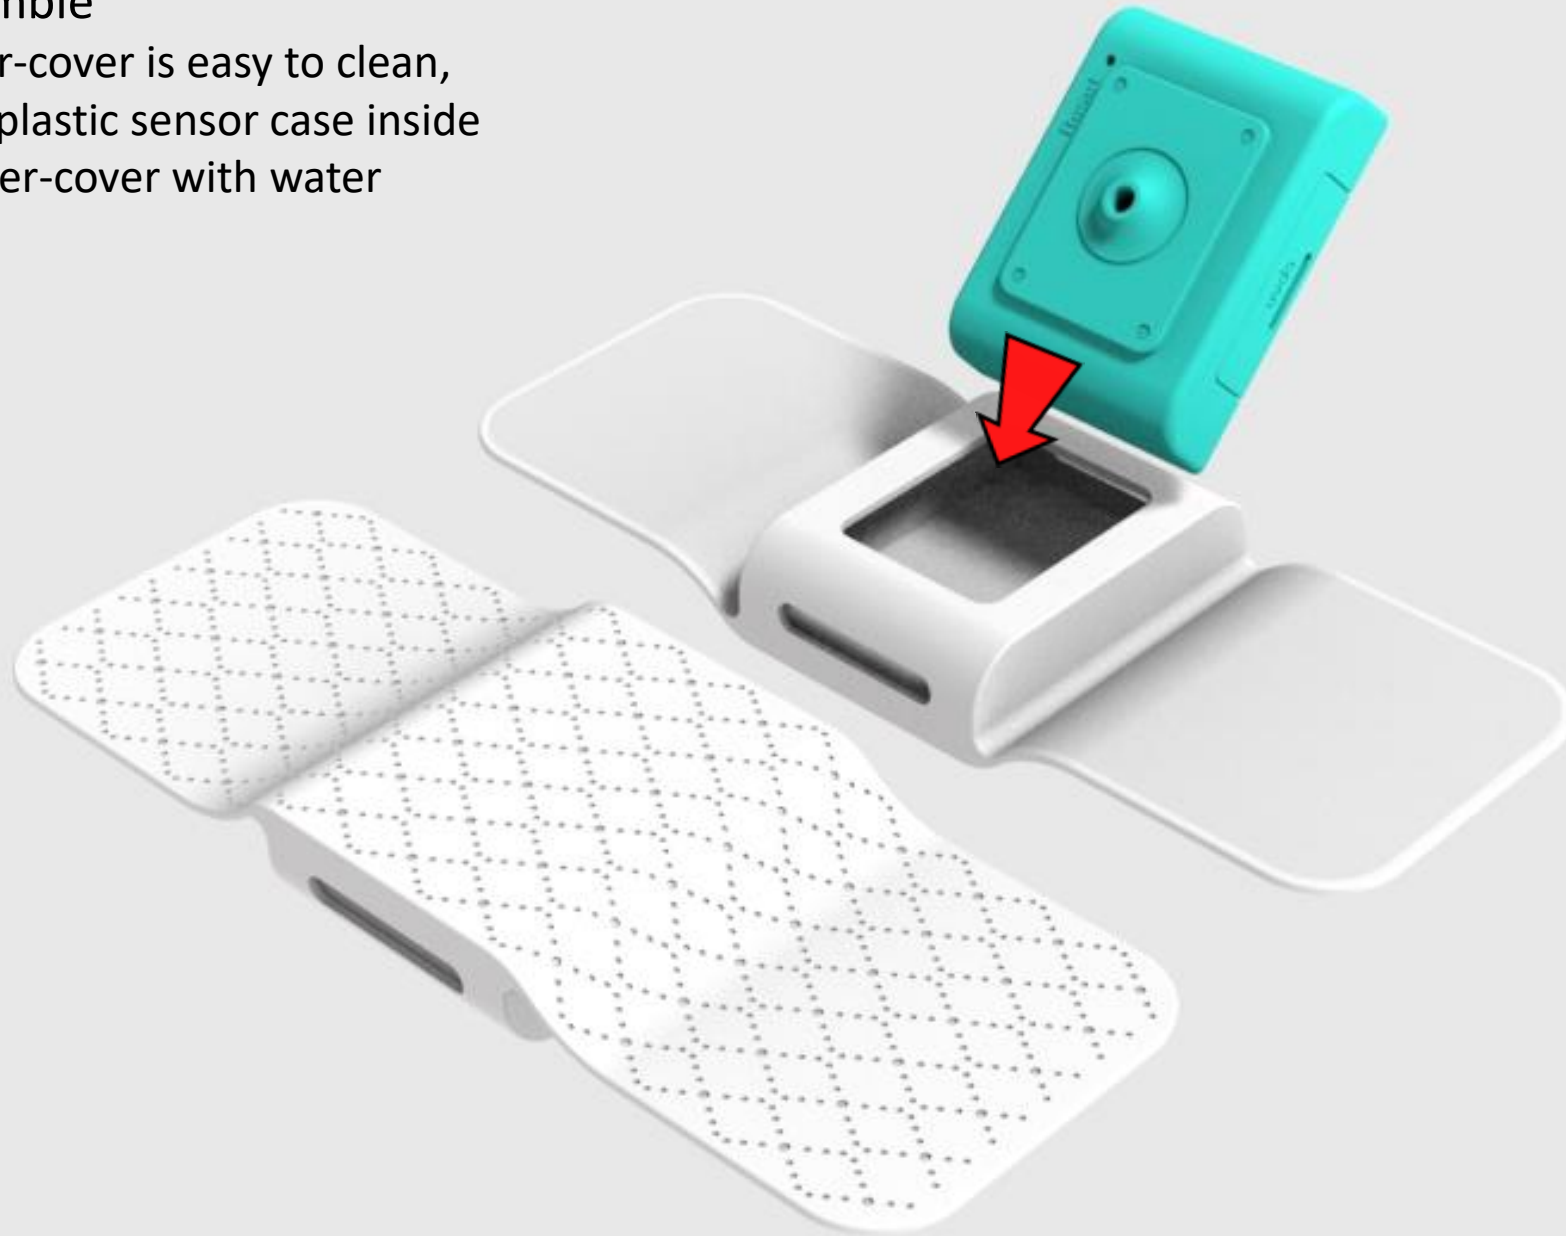

ABS material / matte

White Velcro / soft material
Special synthetic production techniques

White silicone material, soft and light weight
Non-toxic coating increases tactile smoothness

Easy to disassemble

The silicone outer-cover is easy to clean,
just remove the plastic sensor case inside
and wipe the outer-cover with water
